# WHY OASIS SWIM SPAS ARE SUPERIOR

## Cheaper to Run

Our 8 Layer Energy Saving insulation system with Thermo Lock Barrier significantly reduces heating costs. Our energy smart filtration pumps use 22-61% less power. The advanced "Spa Net" controller has economy mode, can be connected to a smart meter (saving up to 50%) and is heat pump compatible. The pump and connections are also in place to run a gas heater or heat pump to reduce running costs by up to 75%. A larger pump may be required for some gas applications.

## Easier to Maintain

The "set and forget" multi-function control system has "cleanup", "lockout" and "sleep" modes. Our Easy Care Water Management System with optional UV Sanitiser ensures safe, pure, clean, chlorine free water with minimal effort. Self cleaning, bearingless "aqua stream" jets don't break or get damaged. And our maintenance free cabinets never need oiling.

## A Better Massage, Swim & Exercise Experience

Perfectly positioned "High Flow" swim jets (1 pump for each jet), combined with our "Aqua Lift" Swim System provide maximum lift and resistance for the best swim spa experience. The handrail and swim pole are great for exercise and learning to swim and our broad stream "Aqua-ssage" jets give you a better massage.

## Built to Last

Our oven cured "Tough Bond" spa shells are stronger and thicker. The wrap around ABS base stops vermin and weather getting in. The reinforced galvanised steel frame supports the sides plus every seat for maximum strength. Premium components ensure long life and superior performance. Every swim spa meets all Australian Standards and our Lifetime Support Plan provides support and service for the life of your spa.

## SUPERIOR SPA TECHNOLOGY

Energy Efficient High Flow Filtration Pump

Spa Net "Quiet Flo" High Performance Pumps

Galvanised Steel Frame with Side & Seat Supports

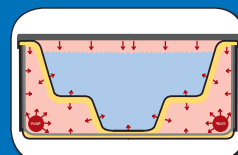

Energy Saving Spa Net SV Control System
